

Lloyd's Lake

Lloyd's lake is a good place for recreating: walking, fishing, picnicking, sailing, and hiking.

This lake provides water for the community; we have a shortage of water in this country and it is wonderful to see all the lakes and ponds full on a good year, but it doesn't last forever. Those who live here try to be very careful with our water supply--it is a priceless commodity.

This foot path around the lake is used by the public; local people built picnic area. Because of volunteerism, there is no vandalism and a sense of ownership.
